Built the washer cleaning category

History

- Currently there are 14 million High Efficiency (HE) washers in consumers' homes
- Over 2.7 million new HE washers are placed in consumers' homes each year
- All manufacturers of HE washers tell their consumers that HE washers need special care to prevent residue and odor – 'Use bleach and leave the door open'
 - Bleach is a topical solution that does not reach the core issue. Thus, the odor may come back in avg. 2 weeks and dissatisfaction from consumers may be high.
- Affresh washer cleaner is the ONLY product co-developed and recommended by the largest manufacturers of HE washing machines in the U.S. – Whirlpool and Maytag
 - Effective in all HE washers Whirlpool, Maytag, LG, GE, Samsung, Kenmore, Frigidaire

New washer cleaning category established by Affresh brand

- \$50 million \$195 million revenue NEW category
 - 14 million current HE washer owners assume 50% may have odor concerns
 - 7 million potential consumer in NEED of solution to odor causing residue in their HE washer
 Will need to use product monthly to assure the recommended maintenance of the machine
 - MSRP of current affresh™ washer cleaner = \$6.99
- Affresh brand strong sales velocity (even without food and mass distribution)
 - Launched Sept 2007
 - Achieved 3.6/store/week in 12 months
 - National distribution through Best Buy, Sears, Lowes and Home Depot

Whirlpool and Maytag brands saw the need and co developed THE solution to odor causing residue in HE washers.

Affresh washer cleaner - 2 years of development with past and future washers in mind

- Whirlpool tests efficacy in 8 areas of the washer
 - Tub
 - Plastics
 - Metal basket
 - Support crossing bars
- Affresh formulated into "Puck" format and placed into the drum of the washer based on washer research
 - Powders and liquids placed in the dispenser will not work with washers that have a clean wash cycle
 - Any substance placed in the dispenser in a clean wash cycle will be washed down the drain during the clean & purge pre-cycle
- Affresh outperforms Tide washer cleaner (2xs as effective) Whirlpool testing labs
 - Per Tide washer cleaner instructions: <u>Run</u> <u>washer in "normal" cycle with the hot washer</u> <u>setting"</u>
 - Normal/hot cycle
 - 1 application / 1 wash
- Independent lab chemical analysis:
 - Affresh has 3x the oxidizing power
 - Affresh has a stronger alkalinity index
 - Tide fragrance levels are excessive which may help "mask" the odor causing residue that is not removed

| Puck format | Powder format | |
|-------------|--|--|
| affresh 6 | And the property of the second | |

| Characterisitics | Affresh | Tide |
|---|---------|----------|
| Oxygenated Cleaner Content | 17+ | 5 |
| (Measured in Percent Hydroge Perceide by Weight of Product) | | - |
| Alkaline Cleaning Power | 28 | -19 |
| (Measured in milligrams KCH per gram of Sample) | | <u>-</u> |

Only Affresh washer cleaner works in ALL washer cycles – Normal and Clean Wash
12 months of sales success indicate NO CONSUMER DISSATISFACTION WITH AFFRESH.
